

Guthrie Elementary School

This 1910 historic Memphis inner-city school was rebuilt to suit today's student/administrative needs, and to serve as an underlining inspiration for students to learn and achieve. A challenge was to build the replacement portions while the old school was still being used. Additionally, historical sensitivity had to be upheld as the overall look, including the original facade, was replicated.

PROJECT DETAILS

Completed: 1999
Cost: \$9,487,000
