

Summary

Founding partner of Clark/Dixon Architects, September 1987

Mr. Clark has more than 43 years of professional experience with an emphasis on project design: administrating and supervising the preparation of the contract documents for the firm's many building projects. Mr. Clark has devoted most of his professional career to the design of public buildings. He has also amassed quite a body of work in historic preservation and adaptive re-use of historic structures. Mr. Clark's abilities in problem solving when confronted with difficult code requirements or physical constraints are second to none. Other designers seek his expertise when difficult issues must be resolved. Over the years, Mr. Clark has had some unique project assignments, perhaps none so unique as the planning and design of a one and one-half mile long scale model of the Mississippi River for Mud Island Park on the Memphis Riverfront. This award-winning park and riverwalk model was recognized as the most significant architectural feature of Memphis in the book "Memphis- An Architectural Guide" by Eugene J. Johnson and Robert D. Russell, Jr.

Experience

Master Plan for Signage and Wayfinding in the Terminal Complex and future parking facilities, Memphis/ Shelby County Airport Authority
