

Springdale Elementary School

The renovation and addition to this school built in 1939 not only added nine classrooms and a library but also served as a reminder of achievement, the power of education and the willingness to strive for more among parents, students, teachers and faculty alike. The addition is so seamlessly integrated into the new design that to the average observer, a difference cannot be spotted.

PROJECT DETAILS

Completed: 2009
Cost: \$4,500,000
