

Mike Rose Soccer Complex

The 120-acre site in southeast Shelby County, Tenn., includes 16 lighted practice soccer fields and an exhibition field with stadium seating for 8,000. The site facilitates and funnels vehicle and pedestrian traffic to the center, where toilet and vending facilities are located, through a pinwheel design. Tree buffers decrease light infiltration into nearby existing and planned neighborhoods.

PROJECT DETAILS

Completed:	2001
Cost:	\$5,000,000
